SECTION A - SUPPLEMENTAL INFORMATION  
Contract: W56HZV-05-D-0135  
Modification: P00006  
For: RESET of Clark 175B Wheeled Loaders  
Amount of Order: ---0---

- The purpose of modification P00006 is to revise paragraph C.3.5. as follow:

C.3.5 Chemical Agent Resistant Coating (CARC) Paint. CARC painting is for spot painting or for whole vehicle repainting, whichever is appropriate per vehicle. The following applies only for vehicles that require CARC painting. The Contractor shall apply the CARC paint system (i.e. clean, pretreat, prime and topcoat) IAW MIL-DTL-53072C. Areas NOT to be CARC painted include: surfaces that reach a temperature of 400 degrees F, materials that flex during service/operation such as rubber hoses, and those where paint would interfere with the function of a part or component. Such surfaces shall be masked or protected during treatment and painting. A pretreatment is required only for bare metal surfaces, or where required corrosion repair has been performed. The performance (I-R signature control) of the CARC system requires CARC primer to be used in conjunction with the CARC topcoat. For whole vehicle repaints, use water dispersible CARC. For spot painting, use single component solvent borne CARC. Vehicles requiring CARC paint, the contractor shall use remaining on-hand quantities of Green CARC for all loaders on Delivery Orders 0001, 0002, 0003, 0004, and 0005 with the exception of Serial #(s) specified in future modifications to Delivery Orders 0001 - 0005. After remaining quantities of Green CARC have been exhausted on these Delivery Orders, all remaining Loaders which require full CARC topcoat shall be done in Desert Tan. All Loaders on Delivery Order 0006 and future Delivery Orders, which require full CARC topcoat shall be done in Desert Tan. Serial number 427C632, on Delivery Order 0005, shall be Desert Tan.
- As a result of this modification, there is neither an increase nor decrease in price.
- All other terms and conditions remain unchanged.
